

**IN THE CLAIMS:**

1. (Original): A lavatory unit, comprising:
  - a first section including a commode;
  - a second section including at least one of a sink and a urinal; and
  - a divider wall for separating the first and second sections.
2. (Original): The unit of Claim 1, wherein the first section includes a sink.
3. (Original): The unit of Claim 1, wherein the first section includes a foldable baby changing table.
4. (Original): The unit of Claim 1, wherein the first section includes a door mounted to a first exterior wall and the second section includes a door mounted to a second exterior wall, the first exterior wall and the second exterior wall are approximately orthogonal.
5. (Original): The unit of Claim 1, further comprising:
  - a third section that shares a wall with the first section and a wall with the second wall.
6. (Withdrawn): The unit of Claim 5, wherein the third section includes drinking fountain.
7. (Original): The unit of Claim 5, wherein the third section includes trash compartment accessible to the first and second sections through openings in the respective shared walls.
8. (Original): The unit of Claim 7, wherein the third section includes trash compartment.
9. (Withdrawn): The unit of Claim 8, wherein the trash compartment includes a trash compactor.

10. (Withdrawn): The unit of Claim 9, wherein the trash compactor is at least one of an electrically powered or manual trash compactor.
11. (Original): The unit of Claim 1, wherein the unit is configured to mount in a vehicle.
12. (Original): The unit of Claim 11, wherein the vehicle is an aircraft.
13. (Original): The unit of Claim 1, wherein the divider wall comprises an arcuate wall.
14. (Original): The unit of Claim 13, wherein the arcuate wall includes a concave portion proximate a center portion of the second section.
15. (Original): A lavatory unit, comprising:  
a first section having a commode operatively disposed therein;  
a second section adjacent to the first section and having at least one of a sink and a urinal operatively disposed therein; and  
a divider wall adapted to separate the first and second sections, the divider wall being a common wall to both the first and second sections.
16. (Original): The unit of Claim 15, wherein the first section includes a sink.
17. (Original): The unit of Claim 15, wherein the first section includes a foldable baby changing table.
18. (Original): The unit of Claim 15, wherein the first section includes a door mounted to a first exterior wall and the second section includes a door mounted to a second exterior wall, the first exterior wall and the second exterior wall are approximately orthogonal.
19. (Original): The unit of Claim 15, further comprising:  
a third section that shares a wall with the first section and a wall with the second wall.

20. (Withdrawn): The unit of Claim 19, wherein the third section includes drinking fountain.

21. (Original): The unit of Claim 19, wherein the third section includes trash compartment accessible to the first and second sections through openings in the respective shared walls.

22. (Original): The unit of Claim 15, wherein the unit is configured to mount in a vehicle.

23. (Original): The unit of Claim 15, wherein the divider wall comprises an arcuate wall.

24. (Original): The unit of Claim 23, wherein the arcuate wall includes a concave portion proximate a center portion of the second section.

25. (Original): An aircraft, comprising:

a fuselage;

a propulsion system operatively coupled to the fuselage; and

at least one lavatory unit operatively disposed within the fuselage, the lavatory unit comprising:

a first section including a commode;

a second section including at least one of a sink and a urinal; and

a divider wall for separating the first and second sections.

26. (Original): The aircraft of Claim 25, wherein the first section includes a sink.

27. (Original): The aircraft of Claim 25, wherein the first section includes a foldable baby changing table.

28. (Original): The aircraft of Claim 25, wherein the first section includes a door mounted to a first exterior wall and the second section includes a door mounted to a second exterior wall, the first exterior wall and the second exterior wall are approximately orthogonal.

29. (Original): The aircraft of Claim 25, wherein the lavatory unit further comprises a third section that shares a wall with the first section and a wall with the second wall.

30. (Original): The aircraft of Claim 25, wherein the divider wall comprises an arcuate wall.

31. (Original): The aircraft of Claim 30, wherein the arcuate wall includes a concave portion proximate a center portion of the second section.
